Questions for Your Team Meeting

Name the Problem

How many people touch a deliverable before it goes out?

How much of your week is coordinating, not doing?

Understand the Cost

If a client calls now, how many people do we ask?

When someone is sick, what breaks first?

Imagine the Fix

What if context traveled with the file, not the person?

What would you do with recovered time?

Commit to Action

Which workflow could we pilot an AI context layer?

Who wants to own own this experiment?
